

- Who? - Designated competent person
- When? - AFTER milking (keep cows in clean area)
- Where? – in the parlour **after wash-up**
- **Use clean gloves throughout process**
- If teats are dirty, wash and dry first, apply pre-dip (min 30sec)
- Wipe off pre-dip with paper towel
- **Focus on one teat at a time – furthest away first**
- Scrub teat end with alcohol and cotton wool until all dirt is removed
- Administer antibiotic and massage into udder
- Administer teat sealant into teat cistern only **(pinch upper end of teat, do not massage)**
- Repeat process for each teat
- Apply post dip
- Clearly mark all dry cows
- Stand cows in clean area for 30 mins
- **Never** immerse tubes in warm water prior to use
- **Record all treatments**
