

**Targets for somatic cell count (SCC) and mastitis indexes, plus
CAFRE Dairy Herd performance over last 2 years**

SCC parameter	Target	Greenmount Future Herd
Cows going from low to high from one milk recording to the next (%)	less than 5%	6%
Percentage of cows above 200,000	less than 20%	13%
Percentage of cows chronically infected (2 or more consecutive recordings over 200,000)	less than 5%	5%
Percentage of cows dried off 'low' and calved in 'low' (under 200,000)	greater than 90%	89%
Percentage of cows dried off 'high' and calved in 'low' (over 200,000 to under 200,000)	greater than 85%	94%
Mastitis parameter		
Number of cows affected per 100 cows per year	less than 20 cows	19%
Number of clinical cases per 100 cows per year	less than 25 cases	27%
Cow with mastitis within 1 month calved	less than 1 in 12 cows (8%)	2%
Cow with mastitis beyond 1 month calved	less than 2 in 12 cows (17%)	17%
