**IMPORTANT INFO FOR CROSS-COUNTRY ACTIVITIES:** Only a "Jockey Skull" of an even round or elliptical shape with a smooth or slightly abrasive surface, having no peak or peak type extensions should be worn for any XC activity. Noticeable protuberances above the eyes or to the front, not greater than 5mm, smooth and rounded in nature are permitted. A removable hat cover with a light flexible peak may be used.

**HEAD CAMS:** When hats are tested against the requirements of a standard, they are done so with no extra additions on the hat i.e. with no head cam attached. Therefore, it is currently not known how the addition of a protuberance such as a head cam, affects how the hat would respond during an impact. Therefore, the use of HEAD CAMS are not recommended at any EAG activity. This includes use on the head, chest, bridle or any other part of the horse or rider.
